

Join our team as an **Account Manager**. 🙌🧑💻🧑💻

Salary: £30,000 - £40,000 DOE

Office: Tarporley, Cheshire

We're looking to bring on board a talented Account Manager to work alongside our Lead Account Manager. We're looking for at least a year of account management experience. You'll be working with several clients across a wide range of sectors including start-ups, national and international brands.

We're a great bunch, and we've created something very special. The team is built up of strategists, creative designers, front-end and back-end developers. Our office is in Cheshire – a purpose-built barn conversion out in the countryside, near the village of Tarporley just a ten-minute drive from Chester. We picked our location for a few reasons: we're 40 minutes from Manchester and Liverpool and easily commutable from North Wales and the rest of Cheshire; we've got a faster internet connection than most city offices; and it's unlimited, free parking. This role isn't necessarily office based if this is preferred, however we will need to hold in-person meetings at our offices - or client offices - for project or team briefings, discovery workshops and client meetings.

The successful candidate will be very organised, and spend their time liaising between clients and our team on the design and build of five-figure and six-figure web and mobile platforms. The role has been created to help us service our growing client base.

The ideal candidate will ideally - but not a requirement - have experience working within a digital agency, and have an understanding of how fast an agency moves. We're looking for someone with the enthusiasm and drive to always reach the next level, whilst being outgoing, a positive thinker, coping well under pressure, and exhibiting a high level of attention to detail.

You will need:

- Excellent written, telephone and in-person communication skills
- The passion and drive to excel in the role
- An understanding of the creative design and web development process
- The ability to read and understand a brief with client objectives
- Ensure all outputs are on-brief and of outstanding quality
- Comfortable working across web, web app, mobile app and occasional branding projects
- Thrive in a fast-paced environment with unmissable deadlines
- Flexible and adaptable working approach to meet needs of our dynamic business
