

# Join our team as a **UX Designer**

Salary: £35,000 – £45,000 DOE  
Location: Cheshire-based hybrid working

We're looking to bring onboard a talented digital designer to work within our Digital Product team, with the role of creating wireframes and full visuals for websites, web applications and mobile apps.

We're looking for at least two years design experience, either working in-house or within an agency, with the enthusiasm to always reach the next level.

As a creative thinker, you'll be able to add real value to the design process and be highly productive. The role requires a can-do and flexible approach, as you will be responsible for working on a diverse range of web, app, and web application projects.

You'll be working with several clients across a wide range of sectors including start-ups, national and international brands. Your schedule and client communications will be managed by our project managers, however we will expect you to manage your time and the deliverables yourself.

## **You will need:**

- An excellent understanding and ability to use Sketch and/or the Adobe Creative Suite
- The ability to act on a brief with client objectives, and visualise a creative solution
- Knowledge of the research process, comparing the market and competitors before work begins
- A good understanding of user experience principles and execution
- To be comfortable working across web, app, and web app projects
- To thrive in a fast-paced environment with unmissable deadlines
- To ensure all outputs are on-brand and on-brief for our clients
- Flexibility and adaptability in your approach to meet needs of our dynamic business

This role would ideally suit a designer with experience in a similar role, used to working in a fast turnaround environment, looking to develop their portfolio and career.
